

ECHO PROTOCOL BRAND GUIDELINES

(By Mr South)

A complete and professional brand system for Echo Protocol.
I designed it to feel trustworthy and modern.

1. BRAND STORY & POSITIONING (which is the foundation)

Name: Echo Protocol

Tagline: “Get paid for showing up. Build reputation that travels.”

Core Idea:

Echo turns “lost labor” into something valuable. Every participant leaves with money and reputation. The brand feels like a clean, reliable system ... it is not a flashy crypto hype, but solid, fair technology that rewards real effort.

Brand Personality:

- Honest & Transparent
- Professional yet approachable
- Efficient and smart
- Future-forward (tech + human)

Voice & Tone:

Speak like a helpful engineer who cares about fairness.
Use short sentences.

Examples:

- “Stake once. Earn as you advance.”
- “Your reputation follows you.”

2. LOGO

Primary Logo:

A stylized “E” made of sound waves (echo) that also look like connected blocks or reputation layers stacking up. The word “ECHO” in bold modern letters, with “PROTOCOL” smaller underneath in clean sans-serif.

Why this works:

- Sound waves = “Echo” (name + reputation that travels)
- Stacking layers = tiers & reputation building
- Simple enough to work small (app icon) and large (website header)

Versions to create:

- Full color (main)
- White (for dark backgrounds)
- Monochrome (black/white)
- Icon-only (just the E wave for favicons and app icons)

Clear Space Rule: Always leave space around the logo equal to the height of the “E”.

Do Not: Stretch it, add effects, change colors randomly, or put it on busy backgrounds.

3. COLOR PALETTE

Primary Colors:

- Deep Ocean Blue (#0A2540) — Main brand color. Feels trustworthy and blockchain-native.
- Vibrant Teal (#00E5C0) — Accent color for actions, payouts, and “wins”. Represents growth and money moving.
- Clean White (#FFFFFF) & Light Gray (#F4F7FA) — Backgrounds for clarity.

Supporting Colors:

- Success Green (#22C55E) — For tier advances and earnings.
- Warning Orange (#F59E0B) — For ghost penalties or deadlines.
- Dark Gray (#1F2937) — Text and neutral elements.

Why these colors?

Blue builds trust (like banks). *Teal* feels fresh and rewarding (like money appearing). High contrast makes everything easy to read on web/apps. Works great in both light and dark mode.

4. TYPOGRAPHY (Fonts)

Primary Font (Headings):

Inter (or similar modern sans like Satoshi) - Bold and clean.
Use for titles, market names, big numbers.

Secondary Font (Body):

Inter again - Regular and Medium weights. Extremely readable.

Why?

Inter is free, looks professional, works perfectly on screens (websites, apps, dashboards).
No fancy scripts . Echo is about clarity and efficiency.

Text Rules:

- Big headings: 32–48px
- Body text: 16–18px
- Always good contrast.

5. VISUAL STYLE & ICONOGRAPHY

Style: Minimal, geometric, with subtle gradients and soft glows on teal accents.
Use thin lines and simple shapes. No cartoon characters.

Key Visual Elements:

- Sound wave patterns (subtle background texture)
- Layered blocks/steps (representing tiers)
- Clean line icons for: stake, advance, reputation, payout, ghost (avoid), badge
- Photography: Real people (diverse) using the platform on laptops, abstract tech patterns, not stock crypto images.

Graphic Devices:

- Subtle grid patterns (like blockchain blocks)
- Progress rings or tier bars in teal

6. APPLICATIONS & MOCKUPS

Website/App Look:

- Dark mode default (crypto feel) with option for light mode.
- Top navigation: Markets | Reputation | My Submissions | Create Market
- Hero section: Big tagline + “Browse Markets” button in teal.
- Cards for markets with clear payout tiers shown as steps.

Social Media:

- Profile picture: Icon-only E wave
- Banner: Deep blue with teal waves + tagline
- Posts: Clean screenshots + short explanations
